

# Environment protection at Papp Logistics

## Guideline

- 1.**  
We, PAPP Logistics Group, are actively committed to environmental protection, conservation of resources and sustainability by reducing waste, cutting down on emissions and saving energy.
- 2.**  
We have a partner in Ökoprofit whose consulting services we use to improve our knowledge of environmentally relevant topics, to exchange ideas with other participants in the programme and to reduce our consumption of resources in a systematic manner.
- 3.**  
We motivate our employees to act in an ecologically responsible manner by providing comprehensive information on environmental protection and raising awareness of all relevant issues. We strive to put sustainability into practice.
- 4.**  
We avoid waste in all areas. We sort and dispose of it properly. This helps us to save resources such as energy and water.
- 5.**  
We purchase materials and operating equipment in a resource-conserving manner.
- 6.**  
We comply with laws and regulations as well as official requirements.
- 7.**  
We actively contribute to protecting the environment by applying these measures. We also expect the Ökoprofit award and the accompanying public relations work to strengthen our brand.
